CURRENT TOPICS.

There is a great boom in olive culture in California.
President Diaz, of Mexico, is about fifty years old.
Herrera, of Mexico, has been elected President of the Republic.

Three wife murderers will be hanged in Memphis June 24.
During the past year 203 persons were killed by wolves in Russia.

The largest cabbage ever grown in Florida weighed 20 1/2 pounds.
G. O. P. stands for "genuine original package" in Kansas and Iowa.

Mr. President Hayes is to erect a handsome monument over his wife's grave.
General Jose E. Joaquin is eighty-four, but as buoyant and active as a man of fifty.

Napier flies are so scarce, because you are not supposed to use napkins a second time.
This influx of immigrants at New York shows a steady increase as the season advances.

A patch of walnut trees of his own planting.
A St. Joseph (Mo.) woman was fined in court the other day for swearing at her mother.

Japan has celebrated the 2555th anniversary of the coronation of the first emperor of the country.

A full-blooded Sioux maiden, Josephine Crowfoot, has just taken vows as a Benedictine nun.

A London grave digger died so suddenly that he fell into a grave that he was excavating for another person.

A man who had been a member of the ex-President Woodbury, was elected to the Yale campus, will cost \$14,000.

India ink is made from burnt camphor and gum. The Chinese and Japanese are the only manufacturers of this ink.

An incorporation has been formed in Chicago to promote the erection of a statue to the memory of General Sheridan.

A French-Belgian wedding in Washington, a few days ago, there were no bridesmaids, nor was there a best man.

American physicians are forming parties to attend the Tenth International Congress of Physicians at Berlin next August.

Julia Honore Grant, the sixteen-year-old daughter of Minister Fred Grant, can speak Spanish, German and French.

At Mrs. Arthur, son of the late President Arthur, has no taste in the direction of politics. All his predilections are social.

There are ninety more firms carrying on business in the food-wheat district of Johnston than there were before the food came.

By an overwhelming majority the school children of New York City have voted in favor of the golden rod as a State flower.

A few days ago Hon. Chauncey M. Depew was summoned to appear in court for the first time in his life, and he is fifty-seven years of age.

The use of electricity as a motive power for street cars will be an important section of the census investigation of the electrical industry.

Wally Wilbur, has chosen his burial place in the Holy City cemetery, near the new New Jersey town of Camden, where he has lived so long.

The quantity of Arctic icebergs met with by ocean steamers this spring has been enormous, and it is a pretty safe indication of a good summer.

The new German Chancellor is a descendant of one of the oldest Italian families, Capri, a branch of the houses of Capri and Montecapri.

Dr. C. E. Harvey has discovered a prototype of Velupik in the Chinook jargon which is used by the Indians in the northwestern portions of this continent.

NOTWITHSTANDING the constant heavy emigration, the population of Great Britain has increased more than 4,000,000 since 1885. The total population is about 55,000,000.

Harris, having declined to give the Brooklyn aldermen free passes to his show, these statesmen increased the license fee for circus men from \$750 a year to \$100 a day.

Lance numbers of applications for pensions are daily received in Washington from the Southern States from soldiers who served in the Mexican and Creek Indian wars.

The charred stump of "Old Sequoia," the giant of California, is forty-one feet in diameter. It has been calculated that the tree must once have been nearly 500 feet high.

JAMES NEWELL, 161, and Mrs. Amy Torrance, 88, were married recently at Laurel Fork, W. Va. The children of the groom did not object, as the old gentleman had outlived them all.

Ten thousand dollars is now the highest recorded price for a violin. The Alard Stradivarius has passed from France to England for that sum, to go into the collection of a Scotchman. It is valued at \$175,000.

There is a plan afoot in New York to establish a flower market in Union Square that shall rival the famous markets of Paris and London. Five hundred men go to New York every day with flowers to sell.

The lady whom Mr. W. O'Brien, the Irish leader, is about to marry is by race and religion a Jewess. She will, before her marriage, be received into the Roman Catholic Church. She has an income of \$4,000 a year.

A colonel died in Alacon, using no instruments except his fingers in extracting teeth. By means of long practice his fingers have become as strong as forceps, and he claims that he can pull teeth faster and with less pain than any dentist with instruments.

The Queen Dowager of Portugal on occasion brought home from Paris 1,000 pairs of shoes. Subsequently she ordered no less than seventy dresses from Worth, to be delivered together, which on their way home were lost at sea. Her Majesty was wayward, sent word to Worth to supply seventy duplicates, and these reached Lisbon safely.

There has been discovered in a convent at Ravenna, Italy, a painting by Giotto containing a portrait of Dante, the only really authentic portrait of him known. It is decidedly different from the accepted idea of the poet's looks.

The Chinamen of Astoria, Ore., are amusing themselves with a huge top made out of an empty 25-pound white lead keg. A square opening is cut in the side, and it takes three men to spin it, one to hold the top and two to pull the string with a stick which sets it in motion. While spinning it sounds like the whistle of a steamship, and can be heard three blocks away.

A CLOUD-BURST.

Immense Destruction By Lightning, Rain, Wind and Hail.

Pittsburgh and other Pennsylvania and West Virginia Towns Flooded.

The heaviest rain and electrical storm known in western Pennsylvania since the year 1850, passed over a large section of Western Pennsylvania on Friday, May 24, doing great damage to property and resulting in the loss of several lives.

Pittsburgh about four o'clock, but no serious damage was done in the old city. In the East End, however, the wind played havoc. Houses were torn down, scattered, and blown away.

On Winchfield, a second five new frame houses were lifted from their foundations and completely destroyed. Another house on Blackhawk Hill, occupied by John Miller, was lifted bodily from the foundation, and blown a considerable distance. At least a score of houses in the vicinity were damaged. The loss is estimated at four millions.

At Greensburg, Pa., the rain poured down in sheets for half an hour. The greatest injury was done by the water which came down White's hollow in a stream nearly five feet wide. At Greensburg, Pa., Wm. Frye, the gardener at St. Joseph's academy, was struck and instantly killed.

A man standing near him was also killed. Lightning also struck Colonel Hill's palatial residence, the First Reformed Church and other buildings, doing great damage in every direction. Near Washington, Pa., lightning struck a derrick in the course of erection on the Colonel Robert Hill farm, shattering it, and killing the man on it.

At Farmington, Pa., lightning struck a man standing near him was also killed. Lightning also struck Colonel Hill's palatial residence, the First Reformed Church and other buildings, doing great damage in every direction.

At Farmington, Pa., lightning struck a man standing near him was also killed. Lightning also struck Colonel Hill's palatial residence, the First Reformed Church and other buildings, doing great damage in every direction.

EIGHT DROWNED.

Fatal Ending of a Boating Excursion on Lake Watappa, Mass.

At Watappa Lake a party of twelve persons, comprising Samuel Witter and wife, Samuel Witter, Jr., Henry Witter, Willie Witter, Levia Buckley, Willie Buckley, Frederick Buckley, Willie Turner, John Buckley, Edwin Witter and George Witter, hired a boat and went boating. There was a strong wind blowing, and the water was rough. The boat into which the party embarked was a common thirteen-foot, flat-bottomed one, and the seating capacity is eight, and was too small to accommodate so many people. The party finally was observed trying to work their way toward shore, just north of the pumping station. This was difficult work, as the water was rough, the wind strong and the rowers inexperienced. When the boat of pleasure-seekers was within twenty feet of the shore, the boat overturned, and the children rocked the boat. The men cautioned the child to remain quiet, but the child was unobedient, and the boat capsized. Heart-rending cries rent the air, which were heard by Fireman Hall, of the pumping station, and James Lafferty, who were unable to render assistance. Mr. Turner was the only one in the party who could swim. He grasped Mr. Witter by the waist and attempted to bring him to shore, and although Mr. Witter was a very man, Mr. Turner succeeded in saving his life. The woman, who was struggling in the water, three or four parties on shore cried to them to cling to the boat, but their falling strength was unequal to the task, and women and children sank out of sight. Four of the party had struck out for their own hook and succeeded in reaching shore in an exhausted condition. The following were drowned, their bodies being recovered later in the day: Samuel Witter, aged fifty; Mrs. Witter, aged forty-five; Henry Witter, aged thirty; Levia Buckley, aged thirty-five; Fred Buckley, aged thirty; Willie Buckley, aged eight; Willie Turner, aged nine.

The Danish steamship Thingvala, which left Copenhagen on the 6th inst., has arrived at New York and Captain Lamb relates a most thrilling experience and an almost miraculous escape from a watery grave. The steamer, which was en route to New York, was overtaken by an iceberg in the early hours of the morning of May 18. Captain Lamb says that it began to get hazy on the 18th. During the night the temperature of the water was taken very frequently, as the vessel was in the region of icebergs coming down from Labrador. Captain Lamb was below and Second Officer Jurgen was on deck. The water's temperature did not indicate the vicinity of any large body of ice. At 5 o'clock in the morning on the 19th, while in latitude 47 deg. 10 min., N. and longitude 47 deg. 30 min. W., the lookout suddenly sighted an immense mass of ice rising twenty-five feet out of the water directly ahead. He shouted a warning, but not in time to stop the steamer. The engines were reversed, but the vessel ran with full force into the berg. Fortunately the ice sloped outward above the water, and it was the upper part of the vessel that suffered. The engines were reversed, but the vessel ran with full force into the berg. Fortunately the ice sloped outward above the water, and it was the upper part of the vessel that suffered. The engines were reversed, but the vessel ran with full force into the berg. Fortunately the ice sloped outward above the water, and it was the upper part of the vessel that suffered.
